I am writing to apply for the Service Desk Spezialist position at think about IT GmbH. With a strong foundation in IT systems and a structured approach to problem-solving, I am well prepared to support your team in delivering high-quality service to end users.

Through my hands-on experience with Linux server administration, Docker, and network configuration, I have developed a solid understanding of hardware and software troubleshooting. I am comfortable working with Windows environments and have practical experience diagnosing issues, documenting them in ticketing systems, and ensuring timely resolution.

In my previous roles, I regularly communicated with users to understand technical problems, tracked progress against SLAs, and created knowledge-base articles to streamline future support. I am accustomed to working independently, following structured processes, and suggesting improvements to enhance service quality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills can contribute to the thinkGROUP team.

Sincerely,

Md Shahanur Islam Shagor
