I am writing to apply for the Praktikum Entrepreneur in Residence position at Stˆ¶rtebekker. Your mission to build Europe's leading D2C men's grooming brand with over 300,000 satisfied customers is impressive, and I am drawn to the opportunity to contribute to a growing startup with a clear product-market fit.

As a Software Engineering student with practical experience in full-stack development and AI engineering, I approach problems analytically and execute projects systematically. My work has involved planning, coordinating, and delivering technical projects from concept to deployment, which aligns directly with the project management and business development responsibilities outlined in this role.

In my professional experience as a Web Developer, I worked closely with company leadership and cross-functional teams to build scalable web applications, integrate payment systems, and implement role-based access controls. I contributed to strategic decisions around technology selection, feature prioritization, and deployment workflows. This has given me a practical understanding of how technical execution supports broader business objectives.

What stands out to me about Stˆ¶rtebekker is the combination of a strong product, a small crew of 10 people, and flat hierarchies. I work best in environments where I can take ownership, communicate directly with decision-makers, and see the impact of my work quickly. I am comfortable supporting product management, online marketing, and financial operations as needed.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I have attached my CV for your review and look forward to the possibility of contributing to Stˆ¶rtebekker's growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
