I am writing to apply for the Projektleiter im Metallbau (Fenster/Fassade) position at Hans Timm Fensterbau GmbH & Co. KG, as advertised through Exzellente Jobs. Your company's reputation as a leading window manufacturer in Germany for over 65 years is impressive, and I am interested in contributing to a team that values precision and quality in every project.

My professional background is in software engineering, where I have developed strong project management capabilities. Over the past four years, I have led the full lifecycle of technical projects, from initial planning and resource allocation to delivery and client sign-off. This experience has taught me to manage timelines, budgets, and stakeholder expectations effectively.

In my role as a Web Developer at Explo-IT, I was responsible for overseeing projects from conception to deployment. I coordinated with architects of the digital kind, ensuring that technical specifications were met and that the final product aligned with client requirements. I actively monitored project progress, adjusted plans to stay on track, and maintained clear communication with all parties involved.

I am accustomed to working independently and taking ownership of project outcomes. I approach each task with a focus on structure and efficiency, ensuring that quality standards are upheld without compromising deadlines. I am confident that this disciplined approach to project management can be applied effectively to the construction and metalworking projects at Hans Timm Fensterbau.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I have attached my CV for your review and look forward to the possibility of discussing how my project management skills can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
