I am writing to apply for the Junior Account Manager (E-Commerce & Retail Media) position at eBazaaris. Your focus on data-driven marketing and retail media strategies for Amazon and pharmacy brands is a compelling area where I believe my analytical mindset and technical foundation can contribute meaningfully.

My background in software engineering has equipped me with strong analytical thinking and a structured approach to managing complex workflows. Through my work on full-stack web applications, I have developed a clear understanding of how e-commerce platforms function, how data flows between systems, and how performance metrics drive decision-making. This technical perspective allows me to grasp retail media concepts quickly and support campaign monitoring and reporting with precision.

In previous work, I collaborated closely with cross-functional teams including advertising, content, and operations. I am comfortable preparing client meetings, organizing timelines, and contributing to growth strategies. My experience building scalable systems has taught me to think in terms of efficiency, data integrity, and continuous improvement, skills that translate directly into supporting account management and client development.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and am actively improving my German. I enjoy collaborating in international and cross-cultural environments.

I am eager to bring my analytical skills, structured work style, and genuine interest in e-commerce and retail media to eBazaaris. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
