I am writing to apply for the Digital Sales and Service Representative position at 1-800 Contacts. The company's focus on making vision care simple and accessible through customer-first service is something I genuinely respect, and I would welcome the opportunity to contribute to that mission.

While my background is in software engineering, I have developed strong digital communication skills through building real-time chat systems and customer-facing platforms. In my work as a Web Developer, I designed and implemented live chat and notification features using WebSockets and Pusher, which required managing simultaneous conversations and ensuring fast, accurate responses. This experience has prepared me to handle multiple customer chats efficiently while maintaining a helpful and professional tone.

I am comfortable learning new platforms quickly and adapting to digital workflows. The NICE CXOne platform mentioned in the job description is a tool I am ready to master during training. I value clear communication, problem-solving, and delivering a positive experience to every customer I interact with.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available for the full-time schedule, including afternoon/evening shifts and weekends, and I am committed to completing the mandatory training. I have attached my CV for your review and look forward to the possibility of joining the 1-800 Contacts team.

Sincerely,

Md Shahanur Islam Shagor
