I am writing to apply for the Junior E-Commerce Consultant position at Cyrus Digital GmbH. Your focus on performance marketing for D2C brands and the structured training path from junior to senior account responsibility is exactly the kind of environment where I want to grow.

Although my professional background is in software engineering, I bring strong analytical thinking, comfort with data, and a methodical approach to problem-solving. I have experience building and optimizing digital platforms, including e-commerce systems, where I worked on authentication, payment integration, and performance tuning. These projects required careful attention to detail, systematic testing, and continuous improvement.

One area that particularly interests me is the opportunity to work directly with real brands and gradually take ownership of accounts. In my previous work as a web developer, I collaborated closely with stakeholders, managed project delivery, and took responsibility for features from planning through deployment. I am used to working independently, learning new tools quickly, and communicating clearly with both technical and non-technical colleagues.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am based in Voronezh and ready to relocate to Munich. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Cyrus Digital.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
