I am writing to apply for the Junior Performance Marketing Specialist position at Cyrus Digital GmbH. Your structured training program and clear development path from junior to senior account responsibility align well with how I prefer to grow professionally.

Although my professional background is in software engineering, I have developed strong analytical and numerical skills through years of working with data, performance metrics, and optimization problems. In my previous roles, I regularly analyzed system performance, identified bottlenecks, and implemented data-driven improvements. This experience has given me a methodical, detail-oriented approach to problem-solving that translates directly to campaign analysis and optimization.

What draws me to Cyrus Digital is the opportunity to learn performance marketing from the ground up under experienced mentors. I am comfortable working with numbers, taking ownership of tasks, and gradually building expertise through hands-on experience. The prospect of starting with campaign support and progressing to full account responsibility for real D2C brands is exactly the kind of growth I am looking for.

In addition to my technical and analytical experience, I work effectively across teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have very good German language skills, and enjoy collaborating in international environments. I am based in Voronezh and ready to relocate to Munich.

I have attached my CV for your review and look forward to the opportunity to discuss how I can contribute to Cyrus Digital’s team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
