I am writing to express my interest in the Software Engineering position at Fischer & Partner Gesellschaft f˙…r Personal mbH. With a strong background in full-stack web development and a focus on building scalable, secure systems, I am confident I can contribute effectively to your team.

My professional experience spans over four years of full-stack development, primarily using Laravel, Next.js, React, and Node.js. I have built and integrated RESTful APIs, implemented authentication and role-based access control, and optimized database performance using MySQL and PostgreSQL. I am also experienced in deploying applications on Linux servers with Nginx, Docker, and CI/CD pipelines.

In my previous role at Explo-IT, I delivered scalable web applications and real-time features using WebSockets. I also developed a full-stack multi-vendor e-commerce platform with Laravel and Flutter, which involved designing complex role-based workflows, integrating payment gateways, and optimizing database queries for performance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I look forward to the possibility of discussing how my skills and experience align with the needs of your team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
