I am writing to apply for the Digital Marketing Trainee position at Cyrus Digital GmbH in Munich. Your structured training program and focus on developing junior talent into independent account managers is exactly the kind of environment where I can grow quickly and contribute meaningfully.

While my professional background is in software engineering, I have consistently worked with data-driven systems that require the same analytical rigor and attention to detail that performance marketing demands. In my previous roles, I built and maintained web applications where I regularly monitored system metrics, optimized database queries, and analyzed user behavior patterns to improve application performance. This experience has given me a strong foundation in working with numbers, identifying trends, and making data-informed decisions.

What particularly interests me about Cyrus Digital is your hands-on approach to training. I am someone who learns best by doing, and your model of gradually increasing account responsibility aligns well with how I have developed my technical skills over the past years. I am comfortable starting with campaign setup and optimization tasks, and I look forward to growing into full account ownership under the guidance of your experienced team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I currently reside in Munich and am ready to start immediately.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical skills and eagerness to learn can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
