I am writing to apply for the Senior Dynamics 365 Consultant position at audius SE. Your focus on building custom business software on Microsoft Dynamics 365 and Power BI, combined with your commitment to digital transformation, aligns with my background in full-stack development and system integration.

Through my professional experience as a Web Developer, I have designed and delivered scalable web applications using Laravel, Next.js, and modern JavaScript frameworks. I have built RESTful APIs, implemented authentication and role-based access control, and integrated payment gateways and third-party services. These skills are directly applicable to configuring and customizing CRM solutions that meet specific client needs.

One area that particularly interests me is the end-to-end project lifecycle described in the role. In previous work, I have taken projects from requirement analysis through implementation, collaborating with stakeholders to ensure solutions are both functional and maintainable. I have also optimized application performance through database indexing, caching strategies, and efficient query design, which supports the analytical and problem-solving demands of CRM consulting.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
