I am writing to apply for the SAP Senior Consultant MM/WM S/4HANA position at STELACON GmbH. While my professional experience is rooted in full-stack and systems engineering rather than SAP consulting, I bring a strong foundation in technical problem-solving, process analysis, and system integration that aligns well with the responsibilities of this role.

In my previous work as a Web Developer, I designed and built scalable web applications using Laravel and Next.js, developed RESTful APIs, and implemented complex authentication and role-based access control systems. I also optimized database performance through query tuning and indexing, and deployed applications on Linux servers with Docker and CI/CD pipelines. These experiences have given me a structured approach to understanding business requirements, designing technical solutions, and ensuring system reliability.

One area that particularly interests me is the opportunity to analyze and optimize logistics and supply chain processes. In my projects, I have worked on systems that required deep understanding of user workflows, data integrity, and integration between multiple modules. I am confident that my ability to grasp complex processes and translate them into technical implementations would allow me to quickly become effective in SAP MM and WM environments.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I also value the transparent culture and professional development opportunities that STELACON offers.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills and approach can contribute to your team’s success.

Sincerely,

Md Shahanur Islam Shagor
