I am writing to apply for the Social Media Content Creator role at LoveLane. Your app Soy & Mochi sounds like a genuinely fun way for couples to connect, and I like the idea of helping more people discover it through creative content.

Although my professional background is in software engineering, I have practical experience creating short-form content for TikTok and Reels. I understand what makes a format work, how to research trending sounds and hashtags, and how to tell a story in under 60 seconds. I am comfortable experimenting with both static posts and video, and I prefer a scrappy, iterative approach over waiting for perfection.

What stands out to me about this role is the full creative cycle you offer: from research and strategy to content creation, posting, and analytics. I enjoy working independently and figuring out what resonates with an audience through real feedback and iteration. I am also comfortable collaborating directly with a founder to define direction and adjust based on performance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how I can contribute to Soy & Mochi’s growth through creative content.

Sincerely,

Md Shahanur Islam Shagor
