I am writing to apply for the IT Co-Founder / CTO role at peeps GmbH. The mission of building a real-world app that connects young people and addresses loneliness resonates with me. I have experience building production applications from the ground up and am ready to take full ownership of the technical side of a startup.

My background is in full-stack development with a strong focus on TypeScript, Python, and Firebase. I have built and deployed applications using these technologies in production environments. I am also experienced with Stripe for payment integration and have worked on AI-driven features in past projects, which aligns with your interest in agentic coding.

In my professional experience as a Web Developer, I have delivered scalable web applications using Laravel and Next.js, integrated real-time features with WebSockets, and deployed on Linux servers with Docker and CI/CD pipelines. I have also built mobile applications using Flutter and Dart, which directly matches your tech stack.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am based in Voronezh, which is within reasonable travel distance to Wˆ…rzburg for in-person coworking and events. I am eager to contribute to peeps' growth and take on the Co-Founder journey. My CV is attached for your review.

Sincerely,

Md Shahanur Islam Shagor
