I am writing to express my interest in the Customer Success Manager role at PraxisConcierge. Your mission to bring meaningful digital innovation to the daily operations of medical practices, MVZs, and clinics is both timely and impactful. The idea of combining AI-driven telephony with existing practice systems to improve patient communication is a practical and powerful approach, and I would welcome the opportunity to contribute to your growth.

My professional background is in software engineering, where I have spent over four years building and delivering web applications. A significant part of this work involved direct client interaction, understanding their operational challenges, and ensuring the solutions we built met their real-world needs. This has given me a strong foundation in proactive communication, relationship management, and the ability to translate complex technical concepts into clear, actionable information for non-technical users.

In my previous roles, I was responsible for guiding projects from initial requirements through to deployment and ongoing support. I learned to listen carefully, ask the right questions, and work collaboratively with both clients and internal development teams to resolve issues and improve the user experience. I am comfortable taking ownership of customer relationships, identifying potential friction points early, and working proactively to ensure customers achieve their desired outcomes.

I am a quick learner with a genuine interest in understanding how people use technology in their daily work. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am eager to bring my technical literacy, communication skills, and customer-focused mindset to the PraxisConcierge team.

Thank you for considering my application. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team’s success.

Sincerely,

Md Shahanur Islam Shagor
