I am writing to apply for the Supply Chain Analyst position at DIVA. Your work in sustainable period care and commitment to conscious wellness is something I genuinely respect, and I would welcome the opportunity to contribute to your operations team.

My background is in software engineering, where I have spent over four years building data-driven systems, managing databases, and automating workflows. I have worked extensively with MySQL, PostgreSQL, and MongoDB, designing schemas, writing optimized queries, and generating reports. These skills translate directly to inventory management, forecasting, and supply chain analytics.

In my professional experience, I developed full-stack applications that required real-time data synchronization, role-based access control, and automated reporting. I built systems that tracked inventory across multiple locations, managed user roles and permissions, and generated monthly performance summaries. I am comfortable working with data reconciliation, KPI tracking, and process documentation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
