I am writing to apply for the temporary part-time Editor Paginator position at Pagemasters North America, a subsidiary of The Canadian Press. I understand the role requires precision, strong news judgment, and the ability to produce accurate headlines and page layouts under tight deadlines. While my professional background is in software engineering, I bring a complementary skill set that aligns well with the demands of this position.

In my previous work as a Web Developer, I regularly managed complex projects that required meticulous attention to detail, clear communication, and the ability to meet strict delivery timelines. I designed and developed a Newsroom Management dashboard using Next.js and Material UI, which involved building interfaces for editors and writers to manage content workflows efficiently. This project gave me direct insight into the publishing process and the importance of accuracy and speed in a news environment.

I am comfortable working independently during evening and weekend shifts, and I am fully capable of working remotely from within Canada. I have strong written and oral communication skills in English, and I am accustomed to collaborating with teams across different time zones and cultural backgrounds.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to the PMNA team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
