I am writing to apply for the Werkstudent (m/w/d) Social Media & Content Creation position at TIGER Deutschland GmbH. The idea of giving a modern, human face to facility management through authentic content is exactly the kind of creative challenge I want to be part of.

My background is in software engineering, but I have always been drawn to the intersection of technology and storytelling. Through my project work, I have built complete digital platforms from the ground up, which required me to think carefully about user experience, visual design, and how to communicate complex ideas clearly. These skills translate directly into creating content that resonates with an audience.

I am comfortable in front of the camera and have experience filming, editing, and publishing content. I understand how to spot trends early and adapt them quickly to fit a brand's voice. I am also skilled at analyzing performance data to refine content strategy, which aligns with your need to evaluate and improve social media channels continuously.

In addition to my technical and creative experience, I work effectively across teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am excited about the opportunity to bring my creativity, technical mindset, and willingness to learn to TIGER. I have attached my CV for your review and look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
