I am writing to apply for the Junior Social Media Content Creator position at Visual Statements GmbH. Your work in building and growing some of Germany's most popular social media brands on Facebook, Instagram, and TikTok is impressive, and I would welcome the opportunity to contribute to your content creation and strategy development.

While my background is in software engineering, I have consistently worked on projects that require clear communication, audience understanding, and concise writing. I am comfortable using AI tools in daily workflows and have integrated AI assistants into real-world applications, which aligns with your expectation of using such tools naturally in the workplace.

One area that particularly interests me is the ability to distill complex ideas into short, engaging content. Through my project work, I have written documentation, user-facing copy, and technical explanations that prioritize clarity and brevity. I enjoy the challenge of making information accessible and engaging for different audiences.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would be glad to discuss how I can contribute to the VS Mediahouse team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
