I am writing to apply for the Fachinformatiker Systemintegration position at YOGITRON Netzwerktechnik GmbH. Your team's approach to IT, where curiosity and hands-on problem-solving matter more than rigid processes, matches how I naturally work.

Through my professional experience as a Web Developer, I have spent years working with Linux servers, configuring Nginx and Apache, managing Docker containers, and setting up CI/CD pipelines. I have deployed and maintained production applications, handled server monitoring, and troubleshot system issues across different environments. This has given me a solid foundation in system administration, virtualization, and network configuration.

What stands out to me about this role is the variety of tasks you described. I enjoy diagnosing problems that others have given up on, tracing issues to their root cause, and finding reliable solutions. Whether it is configuring network switches, setting up VPN connections, or ensuring backups run correctly, I approach each task with the same mindset: understand the system, fix the problem, and document it clearly so the team benefits.

In addition to my technical experience, I work effectively across teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
