I am writing to apply for the Script Writer position at Martell Media. The role's focus on crafting authentic, platform-native content while intelligently integrating AI tools aligns well with how I approach writing and creative work.

In my technical work, I regularly use AI tools like ChatGPT and Claude to accelerate first drafts, generate variations, and test different messaging angles. I understand the difference between relying on AI and using it strategically to increase output without sacrificing quality or brand authenticity. I maintain a strong sense of what sounds human and what does not.

I have experience writing across different formats and adapting tone for specific audiences. I am comfortable collaborating with producers and designers to ensure written content aligns with visual direction and platform expectations. I take direction well and communicate creative feedback clearly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to Martell Media's content team.

Sincerely,

Md Shahanur Islam Shagor
