I am writing to apply for the Ausbildung zum Fachinformatiker:innen/Systemintegration position at Sˆ…dwest IT GmbH systemhaus Stuttgart. This dual training program, combining theoretical study at IT-Schule Stuttgart with practical work in the company, aligns well with my background in system administration and my interest in building a career in IT infrastructure.

My experience includes working with Linux servers, Docker, Nginx, and Apache in production environments. I have deployed and maintained web applications, set up CI/CD pipelines, and managed server configurations to ensure reliability and performance. I am comfortable working across both software and hardware layers, and I approach system integration with a focus on stability, security, and automation.

In my previous role as a Web Developer, I was responsible for deploying applications on Linux servers, configuring web servers, and using Docker for containerized deployments. I also implemented monitoring solutions and automated routine maintenance tasks. These experiences have given me a solid understanding of how different system components interact and how to keep them running efficiently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my hands-on experience and strong learning ability to this apprenticeship. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
