I am writing to apply for the Unternehmens-/Existenzberater position at THL-CONSULTING. Your model of supporting companies in improving structures, optimizing processes, and strengthening employees resonates with my approach to solving complex problems through analysis and structured implementation.

While my professional background is in software engineering, the core skills required for this roleâ analytical thinking, process optimization, solution development, and stakeholder communicationâ are central to my daily work. In my experience as a Web Developer, I regularly analyzed existing workflows, identified inefficiencies, and designed tailored solutions that improved operational outcomes for the businesses I worked with.

One area that particularly interests me is the digitalization aspect of your consulting services. I have hands-on experience with modern digital tools, platforms, and technologies, which allows me to understand both the technical and strategic sides of digital transformation projects. I am comfortable presenting complex information clearly to both technical teams and management-level stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a partnership where I can apply my analytical mindset and structured working style to help your clients achieve measurable improvements. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to THL-CONSULTING and its clients.

Sincerely,

Md Shahanur Islam Shagor
