I am writing to apply for the Strategic Partnerships & Business Development Manager (AWS & Anthropic) role at Datavent. Your focus on delivering modern data, analytics, and AI solutions built on AWS and Anthropic technologies aligns closely with my technical background and my understanding of how technology consulting businesses grow.

What stands out to me about Datavent is the combination of deep technical capability in data engineering, AI, and AWS with a clear need for someone who can bridge that expertise with the right customers and partners. I have spent the last several years working across full-stack development, AI integration, and cloud deployment, which gives me a solid foundation to represent your technical offerings credibly in conversations with prospective clients and partners.

Through my professional experience, I have built and deployed AI-powered applications on AWS infrastructure, including systems that use AWS SES, S3, EC2, and Transcribe for real-world functionality. I have also integrated OpenAI and Replicate AI models into production platforms, giving me practical insight into the types of AI and generative AI solutions Datavent delivers. This technical familiarity allows me to understand what your team builds, how it solves customer problems, and how to communicate that value clearly to decision-makers.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident I can help Datavent identify and develop new consulting opportunities, build lasting partner relationships, and contribute to sustainable revenue growth. I have attached my CV for your review and welcome the opportunity to discuss how I can support your team.

Sincerely,

Md Shahanur Islam Shagor
