I am writing to apply for the Script Writer role at Martell Media. The emphasis on authentic, brand-driven writing that avoids generic AI-sounding content aligns with how I approach written communication.

While my professional background is in software engineering, I have consistently written and refined scripts, captions, and long-form content for web platforms. I understand how to adapt tone and structure for different channels, and I prioritize clarity and rhythm in every piece I write.

One area that particularly interests me is the intelligent integration of AI tools into writing workflows. I use AI to accelerate first drafts, test messaging angles, and build prompt libraries, but I never let it replace the human judgment needed to maintain a strong brand voice.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Martell Media’s content team.

Sincerely,

Md Shahanur Islam Shagor
