I am writing to apply for the Head of Hiring and Training South FL position at 7 Brew Coffee. The role's focus on building processes, ensuring training consistency, and creating a welcoming environment for new team members aligns with my experience in coordinating teams and developing scalable workflows.

What stands out to me about 7 Brew Coffee is the emphasis on culture and community. The responsibility of being the gatekeeper for new hires and training 60-75 brewistas per stand opening requires someone who values consistency, clear communication, and team development. I have experience building structured processes and documentation in technical environments, which translates directly to creating repeatable training systems.

In my professional experience as a Web Developer, I have worked closely with cross-functional teams to onboard new members, document workflows, and ensure quality standards across projects. I have developed training materials and guided junior developers through code reviews and feature implementation, helping them integrate smoothly into the team. This has given me practical experience in creating welcoming environments where new members can learn and grow.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in process-building and team coordination can support 7 Brew Coffee's hiring and training goals.

Sincerely,

Md Shahanur Islam Shagor
