I am writing to apply for the Human Resources Generalist Manager position at Seasoned Recruitment. Your focus on building scalable people operations and a premier staff experience during a growth phase aligns with my approach to creating structured, efficient systems.

My background is in software engineering, where I have spent over four years designing and delivering complex web applications. This experience has sharpened my ability to build processes from scratch, solve problems methodically, and communicate clearly with both technical and non-technical stakeholders. I am accustomed to working in remote-first environments and am available for full-time work within Pacific Time Zone business hours.

In my previous roles, I have managed end-to-end project delivery, collaborated with leadership to define requirements, and built scalable workflows that improved team efficiency. I have also handled sensitive data and maintained audit-ready records, which has given me a strong appreciation for compliance and discretion. While my domain is technology, the core skills of process ownership, cross-functional partnership, and clear communication transfer directly to HR operations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Seasoned Recruitment’s people operations.

Sincerely,

Md Shahanur Islam Shagor
