I am writing to apply for the Business Analyst position at Rotaract Club of NIBM Kandy. The role's focus on evaluating business processes, gathering requirements, and supporting data-driven decisions aligns well with my experience in technical analysis and cross-functional collaboration.

Through my work as a Web Developer, I regularly collaborated with stakeholders to understand their needs, document requirements, and translate them into actionable technical specifications. This process involved conducting research, mapping workflows, and identifying gaps or improvement opportunities before implementation. I prepared reports and dashboards to communicate progress and outcomes to management.

One area that particularly interests me is using data to support decision-making. I have experience working with SQL and various data analysis tools to extract insights, evaluate project outcomes, and ensure alignment with business goals. My technical background gives me a strong understanding of the software development lifecycle, which helps in bridging communication between business teams and technical teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to the team at Rotaract Club of NIBM Kandy.

Sincerely,

Md Shahanur Islam Shagor
