I am writing to apply for the Public Relations Manager position at Temu. While my professional background is rooted in software engineering and AI, I have consistently worked in cross-functional, international environments where clear communication, storytelling, and strategic alignment were essential to project success.

One area that particularly interests me is how technology companies communicate their value proposition to diverse audiences. In my previous work as a Web Developer at Explo-IT and DataSoft LTD, I collaborated closely with stakeholders, engineers, and external partners to ensure consistent messaging across product launches, documentation, and client communications. This required translating technical details into accessible narratives for non-technical audiences.

Through hands-on project development, I have built platforms that serve multilingual and multi-currency user bases, such as the Travel Agency App for 2Expedition in Armenia. This involved coordinating with international teams, adapting content for different cultural contexts, and ensuring the platform's messaging aligned with the brand's identity across regions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
