I am writing to apply for the Script Writer role at Martell Media. The emphasis on authentic, brand-driven writing that avoids generic AI-sounding content aligns with how I approach written communication. I value clarity, rhythm, and persuasion in every piece of copy.

In my previous work, I have written captions, scripts, and long-form content for digital platforms. I understand how to adapt tone and structure for different channels while maintaining a consistent brand voice. I also use AI tools like ChatGPT and Claude to speed up first drafts and test messaging angles, but I always review and refine the output to preserve authenticity and quality.

One area that particularly interests me is building repeatable frameworks for recurring content formats. I have experience developing structured writing systems that improve efficiency without sacrificing creativity. I am comfortable collaborating with producers and designers to ensure written content aligns with visual direction and platform strategy.

In addition to my writing experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my writing approach can contribute to Martell Media’s content goals.

Sincerely,

Md Shahanur Islam Shagor
