I am writing to apply for the Produktmanager position at BRC Solar GmbH. Your focus on smart electronic solutions for the photovoltaic industry and the emphasis on combining technical product management with strategic partner development align well with my background.

My technical foundation in software engineering, cloud platforms, and API integration allows me to understand the technical depth required for managing product lifecycles and partner integrations. I have worked with AWS, Google Cloud, and various API ecosystems, which directly supports the cloud connectivity and data integration responsibilities outlined in this role.

In my professional experience, I have acted as a technical bridge between development teams and business stakeholders. I have defined product requirements, coordinated with engineering on implementation, and ensured alignment between technical capabilities and market needs. This experience maps well to your need for someone who can manage compatibility testing, partner portfolio integration, and cross-functional coordination.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my technical and product-oriented experience can contribute to BRC Solar’s continued growth.

Sincerely,

Md Shahanur Islam Shagor
