I am writing to apply for the Head of Talent Acquisition, Business & Tech role at Distribusion Technologies. Your work in building the world's leading ground transportation marketplace and connecting operators across 70+ countries with major platforms like Google Maps and Booking.com is impressive. I am interested in contributing to a product-led organisation that is scaling rapidly after its Series C funding.

My background is in software engineering, which gives me a practical understanding of the technical roles you hire for. I have worked as a full-stack developer using Laravel, Next.js, React, and Node.js, and I have collaborated directly with engineering teams, stakeholders, and clients. This experience allows me to assess technical talent accurately, understand what makes a strong engineer, and communicate effectively with both technical and business leaders.

In my professional experience, I have been involved in building and scaling web applications, implementing authentication systems, role-based access control, and payment integrations. I have also worked on real-time features, API development, and deployment pipelines. This hands-on technical background helps me anticipate talent needs, evaluate candidates against real engineering requirements, and contribute to setting the right hiring bar for critical roles.

One area that particularly interests me is the opportunity to design advanced sourcing strategies for hard-to-reach talent and strengthen recruiting operations. I have a systems mindset and enjoy improving processes, not just individual outputs. I am comfortable working in startup environments with global teams and diverse cultures.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
