I am writing to apply for the Director Real Estate, Expansion & Development position at XIAO Beteiligungsgesellschaft mbH. Your description of a hands-on, self-directed role in a family-run company with short decision-making paths resonates with how I prefer to work.

While my professional background is in software engineering rather than real estate, I have spent years building complex systems from scratch, evaluating technical and economic feasibility, and managing projects independently from concept to delivery. I am used to taking full ownership of outcomes and making decisions under uncertainty.

In my most recent role as a Web Developer, I designed and developed scalable web applications using Laravel and Next.js, integrated RESTful APIs, implemented authentication and payment systems, and deployed applications on Linux servers with Docker and CI/CD pipelines. I also built an AI-powered real estate platform that involved training AI assistants, integrating image processing, and implementing role-based access and subscription plans. That project gave me direct exposure to real estate technology and the complexity of property-related systems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can take initiative, solve real problems, and contribute to growth. I believe my analytical mindset, project ownership experience, and comfort with independent work would allow me to contribute meaningfully to XIAO’s expansion plans. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
