I am writing to apply for the Wireless Systems Technical Support Engineer position at Intracom Telecom. Your company's long-standing leadership in wireless access and transmission systems, particularly in packet microwave and millimeter-wave radio technology, is impressive. I am interested in contributing to the support and field implementation of these systems across the United States.

Through my professional experience, I have developed strong problem-solving skills and a methodical approach to troubleshooting technical issues. I have working knowledge of Linux, which I have used extensively for server management, deployment, and system monitoring. I am also comfortable using SQL for data querying and reporting, which aligns with the documentation and reporting responsibilities of this role.

In previous work, I managed computer systems and hardware to ensure optimal performance and security. I collaborated closely with team members to resolve complex technical challenges, often under tight schedules. This experience has prepared me to provide effective technical support for wireless systems and to assist customers with installation and training in the field.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background can support Intracom Telecom's technical support operations.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
