I am writing to apply for the GET position at Yokogawa. Your work in industrial automation, artificial intelligence, and industrial cybersecurity is impressive, and I am interested in contributing to a company that focuses on sustainable technology and global impact.

Through my professional experience as a Web Developer, I have built scalable full-stack applications using Laravel, Next.js, React, and Node.js. I have designed and integrated RESTful APIs, implemented authentication and role-based access control, and optimized database performance with MySQL. These skills directly support the development of reliable industrial information systems.

One area that particularly interests me is the intersection of AI and industrial systems. I developed an AI-powered financial application that integrated OpenAI models for intelligent assistance and used AWS services for authentication, file storage, and deployment. This project gave me practical experience in combining AI capabilities with production-ready backend architecture.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background can contribute to Yokogawa’s mission.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
