I am writing to apply for the CRO Specialist position at sofatutor. Your platform's mission to support children's learning journeys through subscription-based products is compelling, and I am drawn to the opportunity to drive measurable growth through structured experimentation.

My experience in full-stack web development provides a strong foundation for this role. I have built and optimized user-facing interfaces using Next.js, React, and Tailwind CSS, and I am proficient in Figma for creating high-fidelity design concepts. This combination allows me to collaborate effectively with design and engineering teams to translate testing ideas into high-quality experiments.

One area that particularly interests me is the systematic approach to growth experimentation. In my development work, I have consistently used data and analytics to inform decisions, from optimizing database queries to improving UI responsiveness. I am comfortable working with quantitative data and structuring experiments around strategic objectives, ensuring that each test contributes clear learning value.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to sofatutor's growth goals. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
