I am writing to apply for the Script Writer position at Martell Media. Your focus on building people, brands, and ventures that create meaningful impact resonates with me, and I appreciate the emphasis on authentic, non-generic content that performs across platforms.

Although my professional background is in software engineering, I have consistently written and refined content for technical documentation, project narratives, and developer-facing communications. This has given me a strong sense of clarity, rhythm, and persuasion when crafting written assets. I understand how to adapt tone, structure, and formatting for different audiences and platforms without defaulting to generic or AI-sounding language.

One area that particularly interests me is the intelligent integration of AI tools into the writing workflow. I regularly use ChatGPT and Claude to accelerate first drafts, generate variations, and test messaging angles, while ensuring the final output remains authentic and on-brand. I am comfortable building prompt libraries and identifying opportunities where AI can reduce low-value writing tasks without compromising quality.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
