I am writing to apply for the Chief of Staff role at Cambrium. Your work in using AI to engineer precision molecules for performance chemicals is genuinely interesting, and I appreciate the emphasis on ownership and cross-functional impact.

My background is in full-stack development and AI engineering, but I have consistently taken on responsibilities that go beyond pure technical delivery. At Explo-IT, I worked directly with stakeholders to define project scope, manage timelines, and coordinate across teams. I learned to translate ambiguous requirements into clear, actionable plans and to follow through on decisions until completion.

I am comfortable operating in environments where the path is not fully defined. I have built systems from scratch, managed end-to-end project delivery, and maintained internal documentation and processes that kept teams aligned. I also have experience preparing structured materials for external audiences, including investor-facing updates and technical presentations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Cambrium’s strategic operations.

Sincerely,

Md Shahanur Islam Shagor
