I am writing to apply for the Werkstudent (m/w/d) position in Informatik, Informationstechnik oder Elektrotechnik at ConnectingCase GmbH. Your focus on building reliable mobile communication solutions using 5G, WLAN, and satellite technology in challenging environments is exactly the kind of hands-on, real-world engineering work I want to be part of.

What stands out to me about ConnectingCase is the combination of modern networking technologies with practical on-site project work. The opportunity to contribute to the development and testing of communication systems while also helping with customer deployments and technical documentation aligns well with my background in both software engineering and hardware-oriented systems.

Through my studies in Software Engineering at Voronezh State University, I have built a strong foundation in networking, Linux system administration, and hardware configuration. I have worked extensively with Docker, Nginx, Apache, and CI/CD pipelines, and I am comfortable configuring network equipment, diagnosing connectivity issues, and supporting technical deployments. My hands-on experience with Python and C++ has also been applied in research projects involving real-time systems and hardware integration.

In previous professional roles, I developed and maintained full-stack web applications, integrated RESTful APIs, and deployed systems on Linux servers. I also worked on projects involving router configuration, network testing, and technical documentation. This combination of software development and infrastructure experience allows me to contribute effectively to both the development and testing of your communication solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills and enthusiasm for communication technology can contribute to your team. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
