I am writing to apply for the Sales Trainee - B2B Software position at Hallo Welt! GmbH. The opportunity to start a structured sales career in the software industry, with a clear development path toward Account Executive, is exactly the kind of role I am looking for at this stage of my career.

What stands out to me about this position is the combination of technical context and direct customer interaction. Having worked as a web developer for several years, I have built and delivered software products while communicating regularly with clients, stakeholders, and cross-functional teams. This experience has given me a solid understanding of how B2B software is developed, sold, and supported. I know what questions technical buyers ask, and I can speak their language.

In my previous role as a Web Developer at Explo-IT, I collaborated closely with stakeholders to understand requirements, prioritize features, and deliver solutions. I also handled client communication, documented workflows, and coordinated with marketing and engineering teams. These experiences have prepared me well for the structured sales process described in the job: qualifying inbound leads, conducting outreach, identifying decision-makers, and passing qualified opportunities to Account Executives.

In addition to my technical background, I bring strong communication skills and a structured, detail-oriented work style. I am fluent in English and Bengali, have working knowledge of German and Russian, and enjoy working in international environments. I am motivated to learn sales methodologies, CRM tools, and prospecting techniques, and I am ready to take ownership of my development path.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background and motivation align with the Sales Trainee role at Hallo Welt! GmbH.

Sincerely,

Md Shahanur Islam Shagor
