I am writing to apply for the Werkstudent:in Marketing position at Soley GmbH. Your work in product mining and transforming complex product data into actionable insights is genuinely interesting, and I appreciate that marketing sits at the center of your operations rather than at the end of the chain.

My background is in software engineering and full-stack development, but I bring a structured, technical approach to marketing support. I have experience with Figma for creating and maintaining design assets, and I am comfortable working with content management systems and data-driven workflows. I am also prepared to quickly learn Canva and the Adobe Creative Suite to produce social graphics, slides, and one-pager layouts that stay on brand.

In previous work, I have managed content updates for websites, prepared visual assets, and supported operational processes. I am comfortable with research tasks, data organization, and maintaining templates and documentation. I work independently and follow structured processes, which aligns with the need for reliable marketing operations support.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can support your marketing team at Soley.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
