I am writing to apply for the Script Writer role at Martell Media. The focus on building people, brands, and ventures that create meaningful impact resonates with how I approach my own work. I am drawn to the emphasis on authentic, non-generic writing combined with intelligent AI integration.

One area that particularly interests me is using AI tools to accelerate content creation without sacrificing quality or brand voice. In my development work, I have integrated OpenAI APIs to build AI assistants that generate content variations, test messaging angles, and produce first drafts. I understand how to build prompt libraries and writing systems that increase team efficiency while keeping the output natural and human.

I have experience writing clear, structured content for technical and non-technical audiences. I have written detailed project documentation, platform descriptions, and user-facing copy for multiple full-stack applications. I can adapt tone and formatting for different platforms and maintain consistency across channels.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in AI-integrated content workflows and brand-consistent writing can contribute to Martell Media’s content team.

Sincerely,

Md Shahanur Islam Shagor
