I am writing to apply for the IT Consultant Schwerpunkt Finanzen / Beitragswesen position at ODAV AG. Your company's long-standing role as a technology partner for skilled trades businesses is impressive, and I am interested in contributing to your software solutions in the finance and contributions domain.

Through my professional experience as a Web Developer, I have developed a structured approach to understanding client requirements and translating them into practical software solutions. I have worked on full-stack applications using Laravel and Next.js, where I analyzed business needs, designed features, and delivered reliable systems. This process has strengthened my ability to think analytically about workflows and data.

One area that particularly interests me is the consulting and advisory aspect of this role. In my previous work, I regularly communicated with stakeholders to clarify requirements, explain technical concepts, and ensure the delivered solution matched expectations. I am comfortable preparing documentation, conducting training sessions, and supporting users during software adoption.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background aligns with the needs of your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
