I am writing to express my interest in the Steuerberater position at Taxtalente.de for a partner firm in Hamm am Rhein. While my professional background is in software engineering, I bring a strong foundation in digital process optimization, secure data architecture, and system reliability that aligns well with a modern, digitally-oriented tax consultancy.

Through my professional experience as a Web Developer, I have designed and built scalable full-stack applications using Laravel, Next.js, and React. I have worked extensively with MySQL and PostgreSQL databases, focusing on data integrity, efficient query design, and secure data handling. These skills are directly applicable to managing and reviewing financial data and tax documentation in a digital environment.

One area that particularly interests me is the emphasis on a digital working style and modern equipment. I have hands-on experience deploying and maintaining applications on Linux servers using Docker, Nginx, and CI/CD pipelines. I have also implemented role-based access control and secure authentication systems, ensuring that sensitive client data remains protected. This technical foundation supports the efficient, paperless workflows that modern tax firms rely on.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical and analytical skills can contribute to your partner firm’s success.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
