I am writing to express my interest in the Steuerberater position at Taxtalente.de. While my professional background is in software engineering rather than tax consulting, I bring a strong foundation in building digital platforms, automating workflows, and working with modern technology stacks.

Through my professional experience as a Web Developer, I have designed and developed full-stack applications using Laravel, Next.js, React, Node.js, and MySQL. I have built systems that handle complex business logic, user authentication, role-based access control, and real-time data processing. I am comfortable working with digital tools and optimizing processes for efficiency and reliability.

One area that particularly interests me is the emphasis on digital workflows and modern tools in your partner firm. I have experience deploying and maintaining applications on Linux servers with Nginx, Docker, and CI/CD pipelines. I have also integrated third-party services such as payment gateways, cloud storage, and social logins into production systems. I am confident I can contribute to maintaining and improving the digital infrastructure of a forward-thinking tax firm.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
