I am writing to apply for the Abteilungsleitung Kreditberatung Markt position at Spreewaldbank eG. Although my professional background is in software engineering rather than banking, I bring a strong foundation in analytical thinking, structured problem-solving, and system-level design that I believe can be valuable in a leadership role focused on strategy, process, and growth.

In my work as a Web Developer at Explo-IT and DataSoft LTD, I have consistently taken ownership of complex projects, from designing scalable backend systems with Laravel and Node.js to building responsive frontends with Next.js and React. I have worked extensively with databases like MySQL and PostgreSQL, implemented secure authentication and role-based access control, and deployed applications on Linux servers using Docker and Nginx. This technical discipline has trained me to think in terms of architecture, reliability, and continuous improvement.

One area that particularly interests me is the opportunity to lead and develop a team while also managing client relationships. In my previous roles, I collaborated directly with stakeholders, translated business requirements into technical solutions, and ensured clear communication between teams. I am comfortable taking initiative, driving changes, and working as a bridge between leadership and execution.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my structured approach, adaptability, and commitment to delivering results would allow me to contribute meaningfully to Spreewaldbank eG. I have attached my CV for your review and welcome the opportunity to discuss how I can support the bank’s strategic goals.

Sincerely,

Md Shahanur Islam Shagor
