I am writing to apply for the Content Creator position at Triviar Education GmbH. Your mission to redefine local experiences through diverse courses and events is genuinely interesting, and I appreciate that you are looking for someone who can capture the authentic energy behind those experiences.

Although my professional background is in software engineering, I bring a strong visual and technical skill set that directly supports content creation. I have hands-on experience with Figma for UI/UX design and have built visually polished, responsive interfaces using Tailwind CSS and MaterialUI. I understand what makes content engaging from a design perspective and how to structure visual storytelling for different formats.

Through my work as a Web Developer, I have collaborated with marketing and design teams to produce website trailers, promotional videos, and social media assets. I am comfortable being on camera, conducting interviews, and editing raw footage into finished content. I approach content planning with the same structure and reliability I apply to technical projects.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am based in Voronezh and am willing to travel to Kˆ¶ln / Dˆ…sseldorf for on-site work. I have attached my CV for your review and would welcome the chance to discuss how I can contribute to the Triviar team.

Sincerely,

Md Shahanur Islam Shagor
