I am writing to apply for the Senior IT-Projektmanager position at Karriereweg GmbH. The role involves managing strategic IT projects in digitalization, infrastructure, and post-merger integration within a CIO-office environment. This combination of project management, stakeholder coordination, and change communication aligns with my professional experience.

In my work as a Web Developer, I have managed multiple full-stack projects from initial planning through deployment. This included defining project structures, setting up reporting workflows, tracking milestones, and ensuring accountability across teams. I am comfortable working with structured processes and maintaining clarity on tasks, timelines, and responsibilities.

One area that particularly interests me is stakeholder management across different levels. I have experience coordinating with clients, developers, and business teams to align technical delivery with strategic goals. I also communicate changes clearly and ensure that all parties stay informed and engaged throughout the project lifecycle.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project management approach can contribute to your team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
