I am writing to apply for the Dutch Speaking Customer Service Agent position at Mercier Consultancy. The opportunity to work remotely in Greece while supporting customers for Imperial is genuinely appealing, and I am ready to bring my communication skills and international experience to this role.

Although my professional background is in software engineering, I have developed strong written and verbal communication skills through years of collaborating with international teams, clients, and stakeholders. I understand that effective customer service requires patience, clarity, and the ability to listen carefully before responding. These are skills I have practiced daily in technical environments where explaining complex concepts to non-technical audiences is essential.

I am fluent in Bengali and English, with working knowledge of Russian and Hindi. I am comfortable communicating across cultures and have experience working remotely with teams based in different countries. I am confident I can handle customer enquiries via telephone, email, and live chat with professionalism and a solutions-oriented mindset.

I am also willing to relocate to Greece and meet all the requirements listed, including holding a valid EU passport. The relocation package and the chance to work in an international environment make this an attractive opportunity for me.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
