I am writing to apply for the Operations Supervisor Healthcare South Georgia role at Belle. Your mission to bring joy to healthcare through in-home preventive care is genuinely inspiring, and I appreciate how Belle combines community health work with data-driven outcomes to improve seniors' quality of life.

Although my professional background is in software engineering, I have consistently taken on responsibilities that require strong people coordination, process management, and cross-functional communication. In my previous roles, I worked closely with stakeholders, managed project delivery timelines, and ensured that teams stayed aligned on goals and quality standards.

One area that particularly interests me is technician development and field support. I have experience onboarding new team members, conducting code reviews (analogous to performance reviews), and providing real-time coaching to improve output and consistency. I am comfortable giving direct, constructive feedback and fostering a culture of accountability and continuous improvement.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am based in South Georgia and available to travel locally to support Community Health Workers in the field. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Belle's growth and mission.

Sincerely,

Md Shahanur Islam Shagor
