I am writing to apply for the Construction Inspector position at AECOM. Your work on municipal infrastructure projects, including water and wastewater treatment facilities, aligns with my interest in building systems that require precision, documentation, and compliance.

In my professional experience as a Web Developer, I have developed a strong ability to read and interpret technical specifications, document processes thoroughly, and ensure that every component meets defined standards. I have worked with inspection documentation tools, maintained detailed daily logs, and coordinated with cross-functional teams to resolve issues efficiently.

One area that particularly interests me is the responsibility of monitoring contractor activities for compliance with project plans and municipal standards. In previous roles, I have consistently ensured that deliverables matched specifications, tracked progress through structured reports, and communicated clearly with stakeholders to maintain alignment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to AECOM’s infrastructure projects.

Sincerely,

Md Shahanur Islam Shagor
